Quick Reference for your
Honeywell touchscreen programmable thermostat

This thermostat is ready to go!

Your new thermostat is pre-programmed and ready to go. Just set the time and day. Then check the settings below and change if needed:

Clock setting

To set the current time display, press CLOCK, then press ▲ or ▼ to adjust the time. Press and hold ▲ or ▼ to advance the time more quickly. Press DONE to save & exit (or press CANCEL to exit without changing the time).

Note: The real-time clock should never require adjustment since it automatically updates for daylight savings time, and stores all date/time information.

System setting

Press the SYSTEM button to select, then press DONE.

- Heat: Thermostat controls only the heating system.
- Cool: Thermostat controls only the cooling system.
- Off: Heating and cooling systems are off.
- Auto: Thermostat automatically selects heating or cooling depending on the indoor temperature.**
- Em Heat (only for heat pumps with auxiliary heat): Thermostat controls Emergency and Auxiliary Heat. Compressor is locked out.**

** Select models only

Fan setting

Press FAN to select fan operation, then press DONE.

- On: Fan is always on.
- Auto: Fan runs only when the heating or cooling system is on.
- Circ: Fan runs randomly, about 35% of the time, not counting any run time with the heating or cooling system.

You can press FAN to override the fan settings you’ve programmed for different time periods. If you select On or Circ, the setting you select will remain active until you press FAN again to select Auto.

Battery replacement

Batteries are optional (to provide backup power) if your thermostat was wired to run on AC power when installed.

Install fresh batteries immediately when the LO BATT warning begins flashing. The warning flashes about 30 days before batteries are depleted. Even if the warning does not appear, you should replace batteries once a year, or before leaving home for more than a month.
To adjust program schedules

1. Press SCHED, then EDIT.
2. Press day buttons (MON-SUN) to select day(s).
3. Press ▲ or ▼ to set Wake time for selected day(s).
4. Press ▲ or ▼ to set Heat and Cool temperature for this time period.
5. Press other time periods (LEAVE, RETURN, SLEEP) to set time and temperatures for each.
6. Press DONE to save & exit (or press CANCEL to exit without saving changes).

Program schedule override (temporary)

Press ▲ or ▼ to immediately adjust the temperature. This will temporarily override the temperature setting for the current time period.

The new temperature will be maintained only until the time you set. When the timer expires, the program schedule will resume and set the temperature to the level you’ve programmed for the current time period.

To cancel the temporary setting at any time, press CANCEL (or SCHED). The program schedule will resume.

Program schedule override (permanent)

Press HOLD to permanently adjust the temperature. This will turn off the program schedule. Whatever temperature you set will be maintained 24 hours a day until you manually change it or press CANCEL (or SCHED) to cancel “Hold” and resume the program schedule.

EnergyStar® settings for maximum cost savings
